

GENERAL SCHOOL PROGRAMS

Energy Smart & Electrical Safety Program

Call PPEC to schedule a time

The Energy Smart Program is a science-based study of all things energy—where it comes from, how we use it in our daily lives, and how our own behaviors can help us save both the planet and our pocketbook. Students learn all about energy science, efficiency principles, conservation practices, and electrical safety through hands-on activities. *Table-top or high-voltage demos are also available to teach students power line safety. Presentations are tailored for the class age.*

E3 Smart Program

Call PPEC to learn more

PPEC and Ohio's Electric Cooperatives have paired with the Ohio Energy Project to educate students in grades 3-12 on energy use through the E3 Smart program. Teachers will be provided the curriculum, laboratory equipment, and support activities to bring STEM learning to the classroom — at no cost to you or your school. E3 also uses an innovative “Kids Teaching Families” approach to bring learning home. The curriculum adheres to all state educational standards.

GRADE SCHOOL PROGRAMS

Camp Kilowatt

Applications: Open Early December
Program Date: Early June

Camp Kilowatt is a fun and unique camp experience for sixth grade students going into seventh grade. Each year, the camp is held at Camp Tecumseh in Brookston, Indiana. Kids get the chance to learn more about energy while making new friends and enjoying fun activities and games. This dynamic three-day

camp includes activities such as horseback riding, bucket truck rides, rock climbing, archery, alternative energy education, internet safety, zipline, live line safety demonstration, swimming, and much, much more.

JUST ZOO IT

SCHOOL FIELD TRIP OR ZOOMOBILE MINI-GRANT

Applications: Due mid June
Program Date: May - October

Embark on a learning adventure with the Fort Wayne Children's Zoo! First and second-grade classrooms can apply for a mini-grant that will help provide support for field trips or in-classroom zoomobile programs during the school year.

HIGH SCHOOL PROGRAMS

Youth Tour

Applications: December - February
Program Date: Mid June

Every June, approximately 40 students from around the state attend the Ohio's Electric Cooperatives Youth Tour. This weeklong, all-expense-paid leadership experience takes high school sophomores and juniors on a fun and unique trip to Washington, D.C., where they meet 1,600 other co-op teens from around the country. While in D.C., students learn about the unique cooperative business model, visit Capitol Hill to meet with Ohio's legislative leaders, and experience the sights, sounds, and rich history of our nation's capital.

Children of Members Scholarships

Applications: December - February

Since 1954, Ohio's electric cooperatives have been helping graduating seniors continue their education through the Children of Members Scholarship Program. Each cooperative awards scholarships on a local level and will select one representative to compete for additional scholarship money from the Ohio statewide association, Ohio's Electric Cooperatives.
